THE SECRETARY OF THE TREASURY,

TRANSMITTING

*Estimates of appropriations required for the service of the fiscal year
ending June 30, 1877.*

TREASURY DEPARTMENT,
December 6, 1875.

SIR: In conformity to the requirements of sections 3669, 3670, and 3672 of the Revised Statutes, I have the honor to transmit, for the information of Congress, the estimates of appropriations required for the service of the fiscal year ending June 30, 1877, as furnished by the several Executive Departments; also, statements showing the balances of appropriations unexpended on the 30th of June, 1875; the amounts appropriated for the service of the fiscal year ending June 30, 1876; the net expenditures for the quarter ended September 30, 1875; the estimated amounts that may be required to complete the service of the year, or of prior years, or that may be carried to the surplus fund; the "proceeds of Government property;" the expenditures of the moneys appropriated for contingent expenses of the Independent Treasury for the fiscal year 1875, by acts of Congress, approved March 3, 1875; and a combined statement of the receipts and disbursements of the Government by appropriations, exclusive of the principal of the public debt, for the fiscal year ended June 30, 1875, showing the *apparent* and *actual* revenues and expenses of each branch of the service.

I have the honor to be,

Very respectfully, your obedient servant,

B. H. BRISTOW,

OFFICE OF SURVEYOR GENERAL OF DAKOTA.							
<i>Salaries, Office of Surveyor General of Dakota—</i>							
Surveyor general.....	Mar. 3, 1875	R. S. 18	390 366	2208 1	\$2,000 00		
Clerks in his office	Appropriated.	R. S. 18	393 366	2226 1	6,300 00		
						\$8,300 00	\$8,300 00
<i>Contingent Expenses, Office of Surveyor General of Dakota—</i>							
Rent of office for surveyor general, fuel, books, stationery, and other incidental expenses.....	Appropriated.	R. S. 18	393 382	2227 1	3,000 00		2,400 00
NOTE.—The organic act of this surveying district provides \$6,300 for clerk-hire and \$1,000 for incidental expenses. These amounts being inadequate, the present estimates are submitted as absolutely required. The increased appropriation for clerk-hire is rendered necessary by the increased appropriations for surveys in the field, of both the public and Indian lands, thus adding greatly to the amount of clerical labor to be performed in preparing duplicate plats and field-notes for the General Land Office and Indian Office, and descriptive notes and triplicate plats for the local land offices. The increased estimate for contingent expenses is made with a view to purchasing a fire-proof safe for the security of the original field-notes and plats of the public surveys in the Territory.							
OFFICE OF SURVEYOR GENERAL OF KANSAS.							
<i>Salaries, Office of Surveyor General of Kansas—</i>

NOTE.—The estimate for salaries in this surveying district is made for the purpose of completing the office work and arranging and classifying the original surveying archives of the public surveys, preparatory to delivering the same to the authorities of the State of Kansas, in accordance with the requirements of the act of Congress approved June 12, 1840, (5 Stats., page 384.) The organic act provides \$1,000 for contingent expenses, but this amount being inadequate, the present estimate is submitted as absolutely required for the service. (See act March 3, 1875, 18 Stats., page 366.)							
OFFICE OF SURVEYOR GENERAL OF COLORADO.							
<i>Salaries, Office of Surveyor General of Colorado—</i>

NOTE.—The organic act of this surveying district provides \$4,000 for clerk-hire and \$1,000 for incidental expenses. These amounts are inadequate, and the present estimates are submitted as absolutely required for the service. Extensive surveys of mineral lands in the field, and mapping thereof in the office, call for additional clerical force.							
OFFICE OF SURVEYOR GENERAL OF NEW MEXICO.							
<i>Salaries, Office of Surveyor General of New Mexico—</i>

NOTE.—The organic act of this surveying district provides \$4,000 for clerk-hire and \$1,000 for contingent expenses. These amounts being inadequate, the present estimates are submitted as absolutely required for the service; \$2,000 of the \$4,500 is for a fire-proof safe and new furniture, to take the place of that provided about twenty years ago, now in a very dilapidated condition.

NOTE.—The organic act of this surveying district provides \$4,000 for clerk-hire and \$1,000 for contingent expenses. These amounts being inadequate, the present estimates are submitted as absolutely required for the service. A large portion of the amount estimated for contingent expenses is required for binding the original field-notes and plats of the public surveys; also for additional furniture to accommodate increasing public archives, which are in a dilapidated condition for want of proper fixtures to protect them from destruction.

Trials with Torpedoes—							
For continuing trials to perfect the system and to instruct the engineer troops in the practical application of the same.....	Appropriated.	18	454	1		10,000 00	10,000 00
ORDNANCE DEPARTMENT.							
Ordnance Service—							
Current expenses of the ordnance service.....	Appropriated.	18	454	1	250,000 00		
Reduction made by order of the Secretary of War.....					50,000 00	200,000 00	125,000 00
NOTE.—The amount estimated for under this head is required to pay the expenses at the arsenals of receiving stores and issuing arms and other ordnance supplies; of police and office duties; of rents, tolls, fuel, and lights; of stationery and office furniture; of tools and instruments for use; of public animals, forage, and vehicles; incidental expenses of the ordnance service, including compensation of workmen in the armory and museum building connected with the Ordnance office, and expenses attending practical trials and tests of ordnance, small-arms, and other ordnance supplies not otherwise specially provided for. This amount cannot be reduced without embarrassment to the public service.							
Ordnance, Ordnance Stores, and Supplies—							
Manufacture of metallic ammunition for small-arms.....	Appropriated.	18	455	1	150,000 00		
NOTE.—This will manufacture six millions of cartridges for the arm recently adopted, being about two hundred rounds per man.							
Overhauling, cleaning, and preserving new ordnance stores on hand at the arsenals	do.				50,000 00

<i>Ordnance, Ordnance Stores, and Supplies—Continued.</i>							
Dismounting guns and removing the armaments, &c., from forts being repaired, modified, &c., including heavy carriages returned to arsenals for alterations and repairs, and overhauling and removing obsolete or surplus stores at permanent forts	Submitted				\$25,000 00		
Repairing, preserving, overhauling, painting, &c., the armament, &c., in sea-coast forts, and for payment of labor and enlisted men detailed on extra duty	do				25,000 00		
Saddlers' tools and materials; smiths' tools and materials; tool bags; cavalry forges, with their tools and materials for the cavalry service, as directed in General Order No. 2, Adjutant General's Office, 1873, heretofore supplied by the Quartermaster's department	Appropriated ..	18	455	1	25,000 00		
Repairing ordnance and ordnance stores in the hands of troops	do				25,000 00		
Repairing ordnance and ordnance stores for issue at the arsenals and depots	do				25,000 00		
<i>NOTE.</i> —These amounts are absolutely necessary for the proper preservation and repairs of stores.							
Purchase and manufacture of ordnance stores to fill requisitions of troops	do				200,000 00		
Infantry, cavalry, and artillery equipments, consisting of valises, haversacks, canteens, great-coat straps, &c.	do				100,000 00		
<i>NOTE.</i> —These stores have heretofore been supplied by the Quartermaster's department, but on the recommendation of the Quartermaster General, and to secure for the Army the best quality of stores, the Secretary of War transferred the duty of supplying them to the Ordnance department. The knapsacks left from the war have been all condemned as entirely worthless; twenty thousand of a new pattern have been made for trial in the field. It is absolutely necessary to manufacture a sufficient supply to meet the urgent demands and present wants of the troops in the field.							
Recovering cavalry saddles with leather, manufacture of saddlebags, &c., and overhauling horse equipments for cavalry troops	do				75,000 00		
Purchase of a site for powder depot and its preparation for the erection of suitable magazines	Submitted				50,000 00		
						\$750,000 00	\$370,000 00
<i>Manufacture of Arms at National Armories—</i>							
Manufacture of the new model breech-loading musket and carbine, adopted for the military service on recommendation of the board of officers convened under act of Congress approved June 6, 1872	Appropriated ..	18	455	1	500,000 00		150,000 00
<i>Armament of Fortifications—</i>							
Conversion of heavy ordnance	Appropriated ..	18	388	1	500,000 00		
<i>NOTE.</i> —The object of this estimate is to continue the conversion of smooth-bore 10-inch guns into rifles of eight inches calibre. The small appropriation for the present fiscal year will enable this Department to convert about forty of the 1,294 10-inch guns now in our forts. The necessity for this appropriation was made apparent in the President's special message to Congress of January 20, 1875. Our experiments prove that this is the most economical and sure method of providing efficient guns of medium power, which are indispensably necessary in our fortifications.							
Projectiles for heavy ordnance	Submitted				250,000 00		
<i>NOTE.</i> —This estimate is made to enable the Department to provide a supply of projectiles for the guns, and this amount might be reduced if Congress would permit the Secretary of War to exchange obsolete and condemned projectiles now on hand for new projectiles, thus utilizing the large amount of useless projectiles at present at our arsenals.							
Carriages for heavy guns	do				250,000 00		
<i>NOTE.</i> —This is to provide new carriages, and to improve by alteration those now at our forts. The constant improvement in gun carriages is rendered necessary by the change in character and increase in power of our guns, the position where placed, and the quantity of work required of them; and the cost of our iron gun carriage, with its fixtures and implements, is about equal to the cost of the gun that is to be mounted upon it.							
For proving ground, and providing and proving cannon, carriages, projectiles, fuzes, gunpowder, and other ordnance materials and stores	do				250,000 00		
						1,250,000 00	75,000 00
<i>NOTE.</i> —The necessity for the appropriation is made all the more apparent by the uniform practice of other nations to keep up a well-equipped proving ground, with ample means to prove and test all character and nature of ordnance and other war material, this being the only practicable method of reaching satisfactory conclusions in the endeavor to place our national armament on a proper footing. We have several heavy guns of large calibre that cannot be tested without an appropriation for the purpose, and the necessity for Congressional action was fully endorsed by the President in his special message of January 20, 1875.

MILITARY ACADEMY.							
Current and Ordinary Expenses, Military Academy—							
Repairs and improvements, timber, planks, boards, joists, wall strips, lath, shingles, slate, tin, sheet lead, nails, screws, locks, butts, hinges, glass, paints, oils, turpentine, varnish, stone, brick, lime, cement, plaster, hair, drain-pipe, blasting powder, fuse, iron, steel, tools, mantels, and other such material	Appropriated	18	467	1	\$14,500 00		
Pay of citizen mechanics, and labor employed upon repairs and improvements that cannot be done by enlisted men	do				8,000 00		
NOTE.—The proportionate amount of work that can be done by the labor of enlisted men, and the cost of that not done by such labor, vary from year to year, according to the kind of work and the necessities of the post; and it is impossible to estimate accurately a year in advance the relative amounts necessary for mechanic work and materials. The total of \$22,500, granted for some years past for both items, has been no more than sufficient for the objects named. It is recommended that the item for materials, \$14,500, and that for labor, \$8,000, be consolidated.							
Pay of principal citizen mechanic, for supervision of work by citizen mechanics and labor on repairs	Submitted				1,800 00		
NOTE.—This is a new item, but for an object that is very necessary, as there is constant necessity for the services of a man competent for the inspection of buildings and capable of directing all kinds of mechanical labor pertaining to construction and repair of buildings.							
Fuel and apparatus, viz: Coal, wood, stoves, grates, furnaces, ranges, fire-brick, repairs of steam-heating apparatus, &c.	Appropriated	18	467	1	14,000 00		
Gas-pipes, fixtures, lamp-posts, gas-lamps, gasometers, retorts, and annual repairs	do				600 00		
Fuel for cadets' mess-hall, shops, and laundry	do				3,500 00		
Postage and telegrams	do				300 00		
Stationery, viz: Blank books, paper, envelopes, quills, steel pens, pencils, rubber, erasers, wax, wafers, ink, mucilage, &c.	do				600 00		
Transportation of materials, discharged cadets, and ferriages	do				2,500 00		
NOTE.—This increase of \$700 will be necessary to pay transportation of discharged cadets. The two lower classes, it happens, are larger than heretofore for many years, and the usual proportion of discharges from such classes will necessitate an increase in this item.							
Printing type, materials for office, diplomas for graduates, registers, and blanks	do				900 00		
Compensation to pressman and lithographer, \$50 each	do				100 00		
Clerk to disbursing officer and quartermaster	do				1,650 00		
Clerk to adjutant	do				1,500 00		
Clerk to treasurer	do				1,500 00		
Department of instruction in mathematics, viz: Levelling rod, \$17; measuring tapes, \$17; cleaning and repairing instruments, \$50; text-books, books of reference, and stationery for use of instructors, \$50—in all	do				134 00		
Department of artillery, cavalry, and infantry tactics, viz: Tan-bark for riding-hall and gymnasium	do				300 00		
Repairing camp stools and camp furniture	do				100 00		
Furniture for commandant's office and reception room for visitors	do				300 00		
Repairing gymnasium	do				100 00		
Foils, masks, gloves, fencing jackets, and repairs	Submitted				200 00		
Stationery for use of instructor and assistants, and books	Appropriated	18	467	1	120 00		
Repairs of stalls, mangers, and windows in cavalry stables	Submitted				300 00		
Department of civil and military engineering, viz: Models, maps, instruments, text-books, books of reference, stationery, and contingencies	Appropriated	18	467	1	500 00		
Continuing preparation of text-books for special instruction of cadets. (No further estimate for this purpose is contemplated)	do				2,500 00		
NOTE.—It is suggested that the items of \$500 for models, &c., and \$2,500 for preparation of text-books, &c., be made indefinite as to fiscal year. It is often impossible to make definite contracts, either as to amount of purchase or time of delivery of models, particularly as to those made abroad, and also to fix time and cost for the publication of text-books, the preparation of which cannot properly be hurried.

UNDER THE NAVY DEPARTMENT.							
GENERAL SERVICE.							
Pay of the Navy—							
Pay of commissioned and warrant officers at sea, on shore, on special service, and those on the retired list and unemployed, and for the actual expenses of officers travelling under orders; and for the pay of petty officers, seamen, ordinary seamen, landsmen, and boys, including men for the engineer's force, and for the coast-survey service, 8,500 men, at the pay prescribed by law	Jan. 18, 1875	R. S. 18	249 264 296	1417 1556, 1595 1	}	\$7,600,000 00	\$6,250,000 00
NOTE.—This is the amount made up by close computation and examination of the rolls by both the Fourth Auditor's office and the Navy Department. The appropriations for the last three years have been too small, to make the payments required by the provisions of existing laws. The deficit has only been made up by the balances of the appropriations for pay, available by law for this purpose; all these that can be legally used are now exhausted. (See Appendix, marked "E.")							
Contingent, Navy—							
Rent and furniture of buildings and offices not in navy yards; expenses of courts-martial and courts of inquiry, boards of investigation, examining boards, with clerks' and witnesses' fees, and travelling expenses and costs; stationery and recording; expenses of purchasing paymasters' offices at the various cities, including clerks, furniture, fuel, stationery, and incidental expenses; newspapers and advertising; foreign postage; telegraphing, foreign and domestic; copying; mail and express wagons, and livery and express fees, and freight; all books for the use of the Navy; experts' fees, and cost of suits; commissions, warrants, diplomas, and discharges; relief of vessels in distress, and pilotage; recovery of valuables from shipwrecks; quarantine expenses; care and transportation of the dead; reports, professional investigation, and information from abroad; and all other emergencies and extraordinary expenses arising at home or abroad, but impossible to be anticipated or classified	Appropriated. Shop G: An iron-working and finishing shop for the arsenal.....

Submitted ...

\$200,000 00

NOTE.—In the progress of the arsenal toward completion, the economic reasons for commencing and pushing on the work of building this shop, in accordance with the plans adopted for the arsenal, are clear. Unless it is done, the work of building the arsenal will come nearly to a stand still at the close of this year. There is now employed on the work a carefully-selected and organized force of workmen and mechanics of all needed kinds, with necessary tools and machinery. This organization cannot be broken up, the workmen moved away, the work stopped and resumed again hereafter, without considerable loss. A fair consideration of this subject, in connection with the character of the work, will show its importance. The present low prices of material and labor of all kinds make this a favorable time for prosecuting the work as rapidly as it can be managed economically and thoroughly. The large excavation required for this shop is now much needed for filling low grounds at site of other shops.

Shop I: A wood-working and leather-working shop for the arsenal

.....do.....

65,000 00

NOTE.—The reasons for commencing this shop are the same as those given for shop G. In addition, a considerable advantage in grading and filling would be obtained by carrying on the excavations for the two shops simultaneously. It would also permit putting in the main shaft under the row of arsenal shops, by which to connect the shops with the water-power. It is expected, with this appropriation, to complete the excavations and foundations for the building, and to do as much of the masonry as the appropriation will permit. A main economic advantage of commencing the building is that it will place the work of constructing the shops in such condition that a fair amount of each kind of work, laborers' work, masonry, iron-work, and carpenters' work, will come in each year, and prevent loss by stopping one kind of work and pressing too much of another kind of work into one year. There are certain expenses connected with the construction of the arsenal—office duties; the running of the shops; masters and foremen; special machinery and tools, such as railroads, derricks, hoisting engines, &c.—which are nearly constant. There is economy in using these to their full capacity, accomplishing as much work in a year as can be done economically and well, and in completing the arsenal as soon as practicable.

Shop F: A rolling-mill and forging-shop for the armory.

170,000 00

NOTE.—This building is now in progress. It is expected, with the appropriation asked for, to complete it. The importance of finishing this building, and placing the armory in such condition that it may be used, is clear.

One block of subaltern officers' quarters

Submitted...

27,700 00

NOTE.—This building would complete the immediate and urgent wants of the post for officers' quarters, and it is to take the place of temporary wooden buildings now in use for the same purpose. These temporary buildings were badly built, are much destroyed by rot, and cannot be used without expensive repairs. They are unhealthy, cannot be well warmed, and endanger the arsenal by fire. They are buildings that were originally built for the temporary prison that was located here during the war.

A stone fire-proof building for offices.....

Submitted . . .

78,000 00

NOTE.—This building is intended as a general office for both the armory and arsenal, and for all the business of the post. It is to be fire-proof throughout, and to contain vaults for the books, records, and funds of the arsenal. No office has ever been built for this arsenal. For the present use, rooms have been temporarily partitioned off in the north end of the west wing of shop B, (one of the finishing shops for the armory.) This furnishes sufficient office room, but the partitions are of wood, very temporary, and with only temporary heating arrangements. The office is not comfortable in winter, and there is some danger of fire, endangering the loss of a very costly building and the records of the arsenal. As the office must be built sometime, there are economical reasons for building it now.

New machinery and shop fixtures.....

Appropriated.

27,500 00

NOTE.—It is proposed to put in the new shops such machinery and shop fixtures as can be used with considerable economy in saving cost of buildings, and will at the same time form a part of the permanent machinery of the shops for manufacturing purposes hereafter; but this estimate is for putting main lines of shafting in shop D of the armory and preparing this shop for manufacturing work.

<i>Rock Island Arsenal, Rock Island, Ill.—Continued.</i>							
Sewers; building new roads; care and preservation of water-power; painting and care and preservation of permanent buildings and bridges; building fences and grading grounds and repairs of and extension of railroads...	Appropriated.	18	387	1	\$22,000 00		
NOTE.—This work is almost absolutely necessary in the progress of the work of building the arsenal. The roads are required for immediate use in building operations, and should be so permanently built as to become a permanent part of the arsenal, and this work on roads, grading, and sewers can be done far more economically whilst other excavations and building are going on, and the two kinds of work, which are dependent.							
Improvement of the water-power.....	Submitted				60,000 00		
NOTE.—This estimate is for opening a channel in the rock bed of the river, and improving the wing-dam, to increase the amount of water flowing into the water-power pool during low water.							
Care and preservation of the Rock Island bridge.....	Appropriated.	18	387	1	9,000 00	\$659,200 00	\$309,500 00
NOTE.—This estimate is for care and preservation of the bridges between Davenport, Rock Island, and the island, and the road and causeway on the island connecting the bridges. It includes all ordinary expenses, but is mainly for the expense of operating the draw, for which two sets of hands, consisting of engineer, fireman, and tender, are required—this work is difficult, and excellent men must be employed—and guards for maintaining order on the long bridges in their large use by the public. This extensive use also causes considerable wear and necessity for repairs.							
<i>Benicia Arsenal Benicia, Cal.—</i>							
Putting lightning-rods on three magazines and thirteen public buildings.....	Submitted				1,675 00		
NOTE.—The absence of all signs of electricity in the atmosphere of this country, which has hitherto existed, has induced all persons to leave their buildings without lightning-rods. During the past summer, however, we have had three storms accompanied by lightning, and it is deemed advisable to adopt the usual precautions against the effects of lightning.							
One machine shop	Submitted				69,568 00		
NOTE.—The present shops are too small and are to be used for a storehouse; the money for blacksmith shop was appropriated year before last and that for carpenter shop last year. It is necessary to build this shop near the others to facilitate the work at this arsenal.							
Continuing boring artesian well, or, if artesian water is procured, for putting down permanent iron pipe and turbine wheel, to be run by flow of water, to pump up water to reservoir.....	Appropriated.	18	387	1	6,705 00		
To build a wharf at southwest corner of reserve, where the current comes very near the shore.....	Submitted				11,090 00		
NOTE.—The present wharf, although lengthened twenty-five feet three years ago, has filled out, and at low tide mud is visible at foot of outer piles.							
To repair present old shop building and convert it into a storehouse.....	do.....				5,500 00		
NOTE.—This building is required as a storehouse; if it is not occupied as such, a new storehouse will have to be built for this post.							
To build a steam-engine room and a boiler room under one roof.....	do.....				6,467 00		
NOTE.—Required for new shops.							
To purchase one Harris-Corliss steam-engine, to be obtained in Providence, R. I., and one boiler for same.....	do.....				5,975 00		
NOTE.—Required for new shops.							
Transferring machinery from machine and carpenter shops to the new shops	do.....				3,666 00		
Repairing roads and building sewers and drains.....	Appropriated.	18	387	1	9,876 00		
Grading grounds.....	Submitted				7,589 00		
Permanent repairs of post, machinery for shops, fences, &c.....	Appropriated.	18	388	1	9,907 00		
NOTE.—These amounts are required to reduce the surface of the grounds into a more comely shape, as nature has left it in a very rough state—the difference in level in some places between different parts being two hundred and three feet.

SURVEYING THE PUBLIC LANDS.							
In Louisiana—							
At rates not exceeding \$12 per linear mile for township { and \$10 for section lines, including \$3,000 for the salary } and expenses of a surveyor to locate private land claims {	Appropriated.	R. S. 18	441 383	2395, 2413 1	}	\$20,000 00	\$15,000 00
NOTE.—\$20,000 is estimated for the survey of public lands in the southwestern, southeastern, and northwestern districts, including resurveys in the southwestern district, where, from lapse of time since the original surveys were made, the evidences of survey are frequently obliterated through entire townships and the disposition of lands prevented by the inability of settlers to describe the lands which they desire to enter. The estimate also includes the compensation of \$1,800 per annum and expenses of surveyor to locate and survey confirmed private land claims and to examine and correct old erroneous locations, to complete detached and unfinished surveys, and to prepare the necessary office-work and search for information requisite to properly locate the claims, and to work on the exhibit of private land claims.							
In Florida—							
At rates not exceeding \$12 per linear mile for standard, { \$12 for township, and \$10 for section lines..... }	Appropriated.	R. S. 18	441 383	2395, 2413 1	}	15,000 00	10,000 00
NOTE.—\$15,000 is estimated for the extension of subdivisional surveys over the lands lying between the Watson and Orr and Whitner boundary lines, of Georgia and Florida, in order to adjudicate titles to lands derived from the State of Georgia, under act of Congress, approved April 9, 1872, (Stats., vol. 17, page 52,) and to ascertain the unoccupied Government lands, and make the same available for entry. Also, to survey and subdivide ranges 28 to 34 east, southward; the extreme southern portion of the main land and the islands on the Gulf coast from township 59 southward, some of which are of rich land and now occupied by squatters.

NOTE.—\$70,000 is estimated for the extension of various standard parallels and guide meridians in the northern and southern portions of this district, and to survey township exteriors within the parallelograms formed by the standard lines, in order to ascertain the exact character of the country, and to admit of future subdivisional surveys, to accommodate the advancing settlements. During the year it is intended to make subdivisional surveys in the immediate vicinity of the Dakota River valley, now attracting settlers; also, to subdivide quite a number of townships within the Northern Pacific Railroad grant, between Fargo and Bismarck. Subdivisional surveys are also needed west of Red river, where settlements are already made in advance of the public surveys, and along the Goose River valley.	Appropriated.	18	383	1			
<i>In Montana—</i>							
At rates not exceeding \$15 per linear mile for standard, \$12 for township, and \$10 for section lines; and for heavily-timbered mountain lands, at augmented rates, not exceeding \$18 for standard, \$16 for township, and \$14 for section lines.....	-----	R. S.	441	2395, 2413	} -----	50,000 00	40,000 00
NOTE.—\$50,000 is estimated for the extension of the public surveys over the Judith Basin, containing a large extent of fine agricultural land, well supplied with water and timber, and already attracting many settlers; the settled portion of the valley of the Yellowstone, between Shields river and Sweet Grass creek, for the survey of which petitions have been filed; the settled portions of the Missouri River valley contiguous to Fort Benton; the Red Rock valley, settled throughout its entire length on the main route, between Utah and Montana, the proposed route of the Utah Northern railroad; and over some isolated, unsurveyed townships in which settlements have been made. <i>In Nebraska—</i>							
At rates not exceeding \$15 per linear mile for standard, \$12 for township, and \$10 for section lines.....	-----	R. S.	441	2395, 2413	} -----	75,000 00	75,000 00
NOTE.—\$75,000 is estimated for the extension of the surveys in this district, between the fifth and sixth standard parallels, north from the fourth guide meridian, west to the western boundary of the State, and between the fourth and fifth guide meridians west, northward to the divide between the waters flowing into the Platte and those flowing into the Niobrara, said divide forming the present southern boundary of the Sioux Indian lands. These surveys will embrace a large area of grazing lands in the vicinity of the Platte and Loup rivers, with some lands suitable for agricultural pursuits.	Appropriated.	18	383	1			
<i>In Colorado—</i>							
At rates not exceeding \$15 per linear mile for standard, \$12 for township, and \$10 for section lines, and for heavily-timbered lands at augmented rates, not exceeding \$18 per linear mile for standard, \$16 for township, and \$14 for section lines.....	-----	R. S.	441	2395, 2413	} -----	60,000 00	60,000 00
NOTE.—\$60,000 is estimated for the survey of valuable agricultural and mineral lands acquired by the recent agreement with the Ute Indians and lands in various parts of the district available principally for agricultural purposes, but partly for minerals and timber, embracing lands upon which settlements have already been made, or are likely to be demanded for early occupation. The rapidly increasing settlements in Colorado, induced by its superior advantages of soil and climate and abundant mineral resources, require extensive surveys.	Appropriated.	18	383	1			
<i>In Idaho—</i>							
At rates not exceeding \$15 per linear mile for standard, \$12 for township, and \$10 for section lines, and for heavily-timbered lands at augmented rates, not exceeding \$18 per linear mile for standard, \$16 for township, and \$14 for section lines.....	-----	R. S.	441	2395, 2413	} -----	40,000 00	30,000 00
NOTE.—\$40,000 is estimated for the extension of the base line to the eastern boundary of the Territory, in order to admit of the extension of township and subdivisional lines over the fine agricultural lands on the Upper Snake river, in Eastern Alturas and Oneida counties, and to extend the first standard parallel north, or a guide meridian to the mineral and timber lands in Alturas county; also, to subdivide a considerable extent of country in Owyhee county, south of the first standard parallel south, embracing lands valuable for agriculture, and in some portions containing rich silver mines; subdivisional surveys are also needed on the Malad river, north of the first standard south. NOTE.—\$50,000 is estimated for extending standard parallels and guide meridians to cover the limits of the land grant to the Union Pacific Railroad Company and for surveying township and subdivisional lines of agricultural, grazing, coal, iron, and timber lands within and adjoining the same.							
<i>In Arizona—</i> At rates not exceeding \$15 per linear mile for standard, \$12 for township, and \$10 for section lines.....		R. S.	441	2395,	}	40,000 00	20,000 00
	Appropriated.	18	383	2413 1			
NOTE.—\$40,000 is estimated for surveys in the valleys of the Little Colorado, Verde, Big Sandy, Hossayampa, below Wickenburg, Gila, Upper Santa Cruz, Upper San Pedro, and Sonoita; also for the survey of lands surrounding and adjoining the Pima and Maricopa Indian reservation, some of which have been settled upon for fifteen years; and of lands in the vicinity of the Huachuca Mountains, covering and near to Santa Rita, Pinal, and Ostrich mining districts. Settlements have been made in all these localities. Also for the extension of the lines of public surveys to the extensive mineral localities in several sections of the Territory for the convenience of miners in describing their claims in accordance with legal subdivisions of the public lands.							
<i>Examinations of Public Surveys—</i> Occasional examinations of public surveys in the several surveying districts, in order to test the accuracy of the work in the field.....		R. S.	392	2223	}	10,000 00	10,000 00
	Appropriated.	18	384	1			
NOTE.—\$10,000 is estimated to cover expenses of examiners, to be designated by the Commissioner of the General Land Office or surveyors general, to test the fidelity of the execution of the field-work; also to enable the surveyors general to satisfy themselves of the correctness of the returns made of the field-work where doubts exist as to the faithful execution of the work before approval of the same.

<i>Surveying Confirmed Private Land Claims in Arizona—</i> Surveying confirmed private land claims in Arizona, at a rate not exceeding \$15 per linear mile	Submitted					10,000 00	
NOTE.—These four sums are estimated for the reason that the act of Congress entitled "An act for the survey of grants or claims of land," approved June 2, 1862, (U. S. Statutes at Large, vol. 12, page 410,) which required such surveys to be made at the cost of claimants, was repealed, Feb. 18, 1871, (U. S. Statutes at Large, vol. 16, page 416, and vol. 18, page 384.) Under the circumstances, no contracts for the survey of private land claims can be entered into by the respective surveyors general unless Congress provides the necessary funds for the service. The segregation of the private land claims from the mass of public lands is called for to secure the best interests of the Government, as well as the welfare of settlers located often on public lands, but claimed by grantees as confirmed private claims.							
<i>Survey of Boundary between Colorado and Utah—</i> Survey of the boundary line between Colorado and Utah, being so much of the 32d meridian of longitude west from Washington Observatory as lies between the 37th and 41st degrees of north latitude, at a rate not exceeding \$70 per linear mile; estimated distance 280 miles	Submitted					19,600 00	
NOTE.—The estimate of \$19,600 is necessary to separate the political jurisdictions, so that the respective inhabitants may know to which particular Territory their rights of citizenship belong. The boundary is needed to close the lines of public surveys upon, projected from different bases and meridians; also to enable the local land officers to know that public lands disposed of by them are within their respective districts, and to afford facilities to settlers on surveyed and unsurveyed public lands to apply to the proper land officers to file declarations to enter lands.

<i>Retracing of Boundary between Arkansas and Indian Territory—</i> Retracing and conspicuously marking the boundary line between the State of Arkansas and the Indian territory, at a rate not exceeding \$40 per linear mile; estimated distance 198 miles	Mar. 3, 1875 Submitted	18	476	1, 2	}	\$7,920 00	
<i>Survey of Northern Boundary of Wyoming Territory—</i> At a rate not exceeding \$70 per linear mile; estimated length 344 miles, being part of the 45th degree of north latitude included between the 27th and 34th meridians of longitude west from Washington Territory	Submitted					24,080 00	
NOTE.—\$24,080 is estimated for the establishment and permanent marking of this boundary, in order to segregate the large River Crow Indian reservation in Montana from the Territory of Wyoming; the south boundary of the reservation being common to the north boundary of Wyoming for a distance of 180 miles. The survey of the boundary is also required to close thereon the lines of public surveys in Montana, and to segregate the jurisdiction of the respective Territories.							
<i>Completion of Surveys and Unfinished Records—</i> Completing surveys in those States where the offices of surveyors general have been closed—act June 12, 1840, 5 Statutes, p. 384, and act of January 22, 1853, 10 Statutes, p. 152—and for preparing the unfinished records of public and private surveys in Arkansas, placed in the General Land Office for that purpose, and to be transferred to the authorities of that State	Submitted					10,000 00	
NOTE.—This estimate includes the expenses of the survey of the Cherokee reservation, in townships 7 and 8 north, range 21 west, Arkansas, ceded to the United States by treaty of April 12, 1834—Revision of Indian Treaties, pages 63 and 64—and survey of Detroit arsenal grounds, in the State of Michigan, in accordance with the provisions of the act of March 3, 1875, (18 Statutes, page 510.)							
<i>Renewing Mutilated Records in the General Land Office—</i> Renewing and reprotracting the official township plats of the public and private surveys in Ohio, Indiana, Illinois, Michigan, Missouri, Arkansas, Mississippi, and Alabama	Submitted					10,000 00

APPENDIX A.

Explanation of the estimates for United States Mints and Assay Offices. (See pages 22 to 24.)

I have the honor to submit herewith estimates of appropriations required for the support of this office and the mints and assay offices of the United States for the fiscal year ending June 30, 1877.

Increased appropriations are asked for the mints at San Francisco, Carson, and Philadelphia, and for conducting an assay office at Helena, Montana.

MINT OF THE UNITED STATES AT SAN FRANCISCO.

At San Francisco the increase is due to the fact that an extensive refinery has been equipped in the new mint and refining operations resumed at that point by the United States. The law requires that a charge for the parting of bullion equal to the average expense of the operation shall be deducted from the depositors' bullion, and the proceeds arising therefrom covered, at least twice a year, into the Treasury of the United States; from which it will appear that, while the Treasury will be fully reimbursed for the expenses incurred in the parting operation, the amount realized from the charge cannot be used for defraying the expenses of the mint.

It is estimated that the mint at San Francisco will be called upon during the next fiscal year to part about 1,000,000 ounces of gold deposits, the gross value of which will be, say \$16,000,000, and not less than 8,000,000 ounces of silver bullion containing gold. The charges at the present rates would bring into the Treasury about \$240,000, which amounts to within \$44,200 of the increase estimated for. This balance of \$44,200 will be required on account of the largely increased coinage of both gold and silver.

MINT OF THE UNITED STATES AT CARSON.

At the mint in Carson the increase is rendered necessary by the increased operations in both refining and coining at that institution.

MINT OF THE UNITED STATES AT PHILADELPHIA.

At Philadelphia the increase of \$10,000, under the head of contingent expenses, is rendered necessary on account of the large coinage of subsidiary silver coin, which is manufactured chiefly from bullion produced from the Comstock lode, and which contains about 40 per cent. of gold, rendering parting necessary.

UNITED STATES ASSAY OFFICE AT HELENA, MONTANA.

As it is expected that the building for the assay office at Helena, Montana, will be completed and ready for the machinery during the present fiscal year, the item of \$15,000, submitted for "machinery and apparatus, and fitting up of same," should be made available immediately upon the passage of the act in which it is contained.

An estimate of \$21,500, for the purpose of conducting the melting and assaying of bullion deposits during the fiscal year 1877, has also been included in the estimates for the assay office at Helena, Montana.

I am, sir, very respectfully,

H. R. LINDERMAN, *Director.*

To the Honorable SECRETARY OF THE TREASURY.

APPENDIX B.

Explanation of estimates for the Government Hospital for the Insane. (See pages 50 and 136.)

CURRENT EXPENSES.

At the close of the fiscal year ending June 30, 1875, there were under treatment in the hospital 718 patients, 35 of whom paid a little more than the average cost of their support, leaving 683 who were supported wholly by the Government. At the date of the preparation of these estimates, September 30, 1875, there were 727 patients in the hospital, 31 of whom paid their board and 696 were supported by the United States, showing an increase of 13 of the latter or dependent class of patients in the first quarter of the current fiscal year. At this rate of increase of the dependent patients to the end of the year for which this estimate is made, the average number of patients to be provided for in that year would be 761. In the estimates for the current year (1875-'76) it is stated that 700 patients is "the extreme maximum capacity" of the hospital; and while the number under treatment has been at one time as high as 733, both the Board of Visitors and the Superintendent are of the opinion that it is entirely inadmissible, on sanitary grounds, to retain in the hospital much exceeding 725 patients of all classes, unless temporary wooden buildings should be provided while permanent structures are being erected, furnished, and fitted up; and estimating the average number of pay patients to be 35, there will remain an average of 690 to be provided for from the Treasury of the United States.

The average number of free or supported patients in the hospital, in the year 1874-'75, was 645 $\frac{3}{4}$ and of pay or self-supported patients 52 $\frac{5}{12}$, total average, 697 $\frac{8}{12}$. The average cost of supporting both classes was \$4 40 per week; and, deducting the whole amount received for the board and treatment of pay patients from the gross receipts of the hospital, the average cost per week of the board and treatment of the free patients was \$4 25 $\frac{1}{2}$.

The number of pay patients from whom something has been received, in excess of the cost per patient of supporting the entire household, has been reduced by the removal from the hospital of upwards of 20 transient indigent insane

persons that had been for several years supported by the authorities of the District of Columbia; and as, on that account, and on account of the crowded condition of the house, less is likely to be contributed in the near future than for some years past, by pay patients, towards the support of the establishment, the board estimates the average cost to the Government of supporting each dependent patient will be \$4 33 $\frac{1}{3}$ per week, at which rate it will cost to support an average of 690 patients of this class, for one year, the amount of this estimate, or \$155,895. This estimate is intended to be as close as is consistent with the management of the hospital in accordance with the just requirements of law; and the rate is less than that of last year—of any year, indeed, since 1860—on account of the large and increasing productiveness of the farm and garden and some reduction in the prices of supplies.

BUILDINGS AND GROUNDS.

The original hospital edifice was designed to accommodate a maximum of 350 patients, but, as that number has been exceeded, the ward buildings have been enlarged, from time to time, until there are now upwards of 700 patients under treatment, who, with the necessary officers and employes, make a community of upwards of 850, for whom meat, bread, light, washing, and drainage are to be provided. In the meantime, small additions only have been made to the original buildings and apparatus for furnishing those requisites of support and health; and the convenience and efficiency of these branches of the administrative service render the proposed enlargements necessary, as well as the introduction of such improvements into each as have come into use in the course of the last few years. The whole can be done upon the bases of the existing buildings and appliances, it is believed, for the moderate sum of this estimate.

The amount asked under this head will be required for the painting and repairs necessary to preserve the extensive buildings of the hospital on account of ordinary wear, for such repairs and additions to the furniture, bedding, fittings, and conveniences of the wards as are constantly necessary on account of the destructive habits of the class of patients treated in institutions of this character, and for such additional means and facilities for medical and moral treatment of the inmates as are suggested by experience and the constant progress of this branch of the healing art.

The original hospital edifice and two detached buildings erected prior to 1861 were designed to accommodate a maximum of 350 patients. Since the year 1870 several additions to the original buildings have been made, which together properly accommodate 213 patients. The hospital has, then, proper accommodations for 563 patients. At this time, September 30, 1875, there are 727 patients under treatment in the institution, or 164 in excess of its proper capacity, and there is a steady demand for increased accommodations. The ordinary but very serious evils of overcrowding an institution for the insane can no longer be wholly prevented, and the utmost vigilance is necessary to avert distressing accidents and endemic disease. This brief statement of the situation of the hospital is thought to demonstrate the imperative necessity of its enlargement in some manner. The question now arises, in what manner can the institution be permanently enlarged so as to best subserve the welfare of its inmates? The Board of Visitors and Superintendent have given this important question much consideration, and have no hesitation in strongly recommending the plan of enlargement contemplated by this estimate. Of the 727 patients under treatment on the 30th of September, 1875, 561 were men and 166 women, and as the number of men is so large and so much in excess of the women, they (the men) are strongly disposed to monopolize the grounds surrounding the present buildings and to contract the separate exercise grounds of the women to the smallest compass—a situation which renders necessary many restrictions of personal liberty that are more or less irritating to many individuals of both sexes, and would be wholly unnecessary if each sex occupied a separate building surrounded by its own ample grounds. It is, therefore, proposed to place the department for women on the farm of 175 acres lying on the east side of the public road, where there is an excellent site for the purpose, and relinquish the present buildings, surrounded by 185 acres, and having a water front for fishing, bathing, and boating, to the exclusive use of the men. Provision substantially the same as that here estimated for, for the treatment of insane persons of each sex in buildings and grounds entirely separate from those occupied by the other sex, has been made in the cities of Philadelphia and New York, and in the State of Michigan, and the conductors of those institutions bear the strongest testimony to the unqualified advantages of such separation.

I am, very respectfully,

C. H. NICHOLS, *Superintendent.*

To the Honorable SECRETARY OF THE INTERIOR.

APPENDIX C.

Explanation of the estimates for Columbia Institution for the Deaf and Dumb. (See pages 50 and 136.)

I have the honor to submit herewith estimates of appropriations required for the service of the fiscal year ending June 30, 1877, by the Columbia Institution for the Deaf and Dumb.

The first estimate, that for the current expenses of the Institution, is the same in amount as for several years past.

The second estimate, that for repairs on the buildings, will be much needed by the beginning of the coming fiscal year, and, as it is of the nature of a current expense, might be added to the first estimate, the two being included in one item of fifty thousand dollars.

The third estimate will provide for all the work that can conveniently be completed on the work of our building extension during the season of 1876, and will very nearly complete our buildings as originally planned in 1866; the amount expended being still far within the limit of the original estimates, as will be seen by reference to our last Annual Report.

In my last year's estimates I had the honor to ask an appropriation of four thousand dollars for the improvement and care of the grounds of the institution. This was very much needed for the service of the current fiscal year, but the appropriation was not made; I am therefore compelled to ask for the coming fiscal year an appropriation of ten thousand dollars. The need for this arises in large measure from the fact that during the summer now just passed, the grading of Boundary street, which forms the front line of our grounds, has been completed. In the prosecution of this work, the cuttings and fillings have been such as to make necessary the resetting of our front fence along its entire line.

Trusting that the estimates herewith submitted may seem reasonable, I have the honor to be, very respectfully, your obedient servant,

E. M. GALLAUDET,
President and Disbursing Agent.

To the Honorable SECRETARY OF THE INTERIOR.

APPENDIX G.

Explanations of the estimate for Building for State, War, and Navy Departments. (See page 134.)

OFFICE OF BUILDING FOR STATE, WAR, AND NAVY DEPARTMENTS,
Washington, D. C., July 16, 1875.

SIR: I have the honor to submit the following report of operations on the construction of the east wing of the building for the State, War, and Navy Departments.

The act of Congress making appropriations for the construction of this building, for the present year, is found in volume 18, part 3, page 391, of the United States Statutes at Large, and reads as follows:

"For completing south wing of the State, War, and Navy Departments, under the direction of the Secretary of State, fifty thousand dollars; and for continuing the work on the east wing of the building for State, War, and Navy Departments, seven hundred thousand dollars; to be expended under the direction of the Secretary of War," approved March 3, 1875.

On the 15th of March the Secretary of War called the attention of the Secretary of State to the second provision of said act, and requested to be furnished with copies of all papers, plans, and drawings relating to the construction of the east wing.

On the 23d of March the Secretary of State transmitted to the Secretary of War copies of all contracts that had been made for the construction of the east wing, with the information that the plans, drawings, and specifications, pertaining thereto, were in possession of the Supervising Architect of the Treasury Department.

On the 25th of March, at the instance of the Chief of Engineers, the Secretary of War appointed Col. Q. E. Babcock, Corps of Engineers, to take charge of the continuation of the work on the east wing.

On the 7th of April I enclosed a copy of my appointment to the Supervising Architect of the Treasury Department, with a request to furnish me with the drawings and an inventory of all property pertaining to the building.

On the 27th of April the Supervising Architect transmitted to me the drawings, together with inventories of tools and machinery at the granite quarries at Fox Island, Maine, and at the United States granite-works at Richmond, Virginia.

On the 1st of May I directed my assistant engineer to proceed to Richmond and to Fox Island, to inspect the Government property at each place and make a complete inventory thereof. As soon as he returned, I receipted for the property to the Supervising Architect, and made the necessary arrangements for commencing work.

When I assumed charge some progress had been made in the construction of the east wing. The foundations were laid, and the walls of the basement story were erected complete; iron beams and brick arches were in place for the basement and first floors. The court-yard walls of the first story were built, and the exterior walls of the east front of the first story had been commenced.

The work had been suspended during the past winter and spring, and the materials on hand were as follows, viz: One hundred and seventy-five thousand bricks, all the granite for the court-yard walls of the second, third, and attic stories, and a part of the granite for the exterior walls of the first story; also all the iron columns and pilasters for the entire wing, and sufficient wrought-iron beams for the second floor.

On the 20th of May the four large derricks that had been used in construction of the basement and first-story walls were raised 36 feet higher. The guy-ropes, anchors, and all other attachments pertaining thereto were thoroughly overhauled and repaired. The derricks were finally placed in safe working order by the 20th of June, when the setting of granite was commenced, together with the brickwork.

On the 14th instant the work was suspended on the east front for the want of granite, which, for the east front, comes from the Westham Granite Quarries near Richmond, Virginia. Work at these quarries was suspended during the winter; it was resumed shortly after the passage of the appropriation bill in March, and the stones necessary for completion of the walls of the first story are now quarried, and a part of them are cut and boxed, ready for shipment.

The granite required for the east front of the second story was ordered from the contractor on May 27. It is being quarried and cut, and good progress is being made, nearly 200 granite cutters being at work thereon.

The further progress of the construction of this building will depend, to a great extent, on the rapidity with which granite can be quarried and cut at the Richmond quarries.

The moneys available from the present appropriation are sufficient to furnish the materials and build the exterior walls of the first story, the exterior and court-yard walls of the second story, the brick arches for the second floor, the iron beams and brick arches for the third floor, and a large proportion of the cut granite for the third story.

The estimated cost of finishing the east wing amounts to \$1,378,428 44. This estimate is based on the cost of similar work in the south wing, and on the supposition that the interior of the east wing will be finished in a similar manner.

The estimate is as follows:

Granite-work	\$776,359 24	Painting	\$36,265 04
Brickwork	122,957 28	Mantels	7,500 00
Flagging	1,700 00	Heating apparatus....	35,718 88
Tiling	15,740 00	Grates	1,250 00
Concreting	10,925 00	Balusters.....	11,851 56
Iron-work	401,424 84	Elevators.....	15,500 00
Staircases	76,278 32	Contingencies.....	176,402 58
Carpenter-work	76,296 36		
Slating.....	9,372 00		1,940,428 44
Copper roof.....	14,030 27	Deduct amount of appropriation available.	562,000 00
Down-pipes.....	4,716 00		
Plastering.....	101,792 91	Amount required to finish east wing.....	1,378,428 44
Plumbing and gasfitting.....	37,164 53		
Glazing	7,183 63		

Of this amount, the sum of five hundred thousand dollars should be appropriated immediately after the meeting of Congress, in order that work at the quarries and cutting-sheds may be continued.

Last winter the work was suspended because the appropriation was exhausted, in consequence of which the construction of the building will be seriously delayed during the present season.

Very respectfully, your obedient servant,

O. E. BABCOCK,
Colonel of Engineers, U. S. A.

Hon. W. W. BELKNAP, *Secretary of War.*

APPENDIX H.

Explanation of estimates for Coast-Survey Service. (See pages 150 and 151.)

UNITED STATES COAST SURVEY OFFICE,
Washington, D. C., October 1, 1875.

SIR: I have the honor to submit herewith estimates for continuing the work of the Coast Survey and of the standard weights and measures during the year which will end June 30, 1877. The accompanying papers are—

1. Estimates for the work of the Coast Survey during the next fiscal year, preceded by a brief statement of progress made in the course of the fiscal year 1874-'75.
2. Estimates for new vessels required for the use of the Coast Survey, to supply the place of old vessels.
3. Estimates for continuing the construction of standard weights and measures.

In regard to the item marked 1, it has been found expedient, for economy of results, to include in estimates for work on the Atlantic, Gulf, and Pacific coasts of the United States amounts somewhat larger than the sums appropriated for the present fiscal year; but the estimates under those heads are below the revised estimates which were submitted last year.

In reference to the item marked 2, I would state that, last year, estimates were submitted for thirteen vessels. Appropriation was made for only six vessels; and estimates are now submitted for five vessels, for which there is pressing need in the service, nine of the old and worn-out vessels having been disposed of.

Very respectfully,

C. P. PATTERSON,
Superintendent United States Coast Survey.

Hon. B. H. BRISTOW, *Secretary of the Treasury.*

GENERAL STATEMENT OF PROGRESS IN THE COAST SURVEY FOR THE YEAR ENDING JUNE 30, 1875.

The following abstract shows the distribution, in the course of the fiscal year 1874-'75, of surveying parties along the Coast of the Atlantic and Gulf of Mexico, and on the Pacific Coast of the United States. Starting from the northeastern boundary, on the coast of Maine, the work done will be mentioned in geographical order in going southward towards the Rio Grande boundary, on the coast of Texas. On the Pacific coast, the recapitulation in this abstract will begin at San Diego, on the southern boundary of California, and will terminate with the mention of surveying operations on the coast of Alaska. In general, the same order, in respect of localities, will be observed in presenting my detailed estimates for continuing the work during the fiscal year 1876-'77.

My annual report for the year ending June 30, 1875, will give details, in respect of limits and statistics, of the work done in that year, under the following general heads, namely: Soundings in the Gulf of Maine; development of Jeffrey's Bank, Cashe's Ledge, and Jeffrey's Ledge, and of dangers to navigation near Isles of Shoals; survey of the northwestern part of Mount Desert Island, and soundings in the adjacent waters; topography of the shores, and hydrography of Egge-moggin Reach; survey of numerous islands near Isle au Haut, and in the eastern part of Penobscot Bay; and of the bay shore between Castine and Bucksport, Maine; soundings in Penobscot River, near Winterport; tidal observations at North Haven, on the Fox Islands, Penobscot entrance; determination of height and of coefficient of refraction near Camden, Maine, and of geographical points by triangulation in New Hampshire; tidal observations at Boston navy yard; hydrography westward of Monomoy Peninsula, including the vicinity of Chatham Roads; triangulation and topographical survey of Taunton River, Mass., from Fall River to Somerset; special observations on currents, and soundings in Providence Harbor and Seekonk River, for the use of Harbor Commissioners; survey of the shores of Thames River, Conn., and soundings between the United States naval-station and Norwich; topography of New Haven Harbor; determinations in position of Light-houses at the east entrance of Long Island Sound; hydrography in that vicinity, and special examination for sailing courses into the harbors between Point Judith and New York; survey of Port Jefferson and

soundings in the adjacent waters; triangulation near the boundary line between Massachusetts and New York; latitude and azimuth determined at Cheever Station, near Port Henry; at Mount Merino, near Hudson, N. Y.; and at Rouse's Point; shore-line survey and hydrography of Lake Champlain, extended from the "Four Brothers" southward to Whitehall, including detailed surveys of the vicinity of Crown Point and Ticonderoga; topography of the shores of Hackensack River, N. J.; angular measurements at Beacon Hill and Weasel Mount; preliminaries for determining points in New Jersey; observations for deducing transverse curves of velocity in the waters of Hudson River, East River, and the main channel of New York Harbor; tidal observations at that port; soundings in West Bank Channel and near Southwest Spit, in New York Bay; topography and hydrography of Great South Bay, L. I., between Islip and Howell's Point; survey of the west side and soundings through Barnegat Bay, N. J.; hydrography of the entrance and approaches to Little Egg Harbor; preliminaries for determining points in the eastern part of Pennsylvania; triangulation and soundings for light-house purposes in Delaware River, at Liston's Tree, and near the mouth of the Schuylkill River; magnetic declination, dip, and intensity determined at the standard station in Washington City, D. C.; special topographical survey of Craney Island, Va., and soundings in the channel between it and the main shore; tidal observations at Fortress Monroe; survey and hydrography of James River, from Sloop Point upwards to the vicinity of City Point; and of the Chickahominy, from Ship-yard upwards to Forge Bridge; primary triangulation extended southward along the Blue Ridge to Fork Mount; reconnaissance from that station westward to the Kanawha; triangulation of Pamlico Sound, N. C., completed and connected with the primary base line on Bodie's Island; survey of the shores extended from Juniper Bay northward and eastward to the Roanoke Marshes; hydrography of the sound extended from Shoal Point southward, including Yesocking Bay; detailed survey of the coast of South Carolina, and soundings through the water passages between Cape Romain and Sullivan's Island; preliminaries for tracing the altered shore line at Hunting Island, S. C.; hydrography of Savannah River from the bar upward to the head of Elba Island; hydrography of the coast of Florida north and south of St. Augustine; survey and sounding of the inland sea-water channels south of Mosquito Inlet, including the head of Indian River; detailed survey of the Tortugas Islands, and hydrography of the Harbor and Reef; triangulation and topography of Tampa Bay, and hydrography of the bar and approaches; tidal observations continued at St. Thomas, West Indies; topography and hydrography of the western coast of Florida, between Pepper Keys and Ocilla River; hydrography of the vicinity of Cape San Blas and of St. Joseph's Bay; triangulation and reconnaissance westward and northward of the base-line near Atlanta, Ga.; latitude, azimuth, and magnetic elements determined at primary stations in that vicinity; preliminaries for determining points in the State of Kentucky; special shore-line survey and hydrography of the mouths of the Mississippi; observations on density and relative to the volume of water discharge; the bar and approaches to the Delta sounded, and deep-sea lines of soundings run in the Gulf of Mexico; topography of the Mississippi River above New Orleans; triangulation in Missouri extended westward from St. Louis to the vicinity of Gasconade River; reconnaissance for intervisible stations near the Ohio River; measurement of base-line at Spring Green, Wis., preliminary to the determination of points in Wisconsin; and hydrography completed in San Antonio, Musquit, and Aransas Bays, Texas. On the Pacific Coast, a detailed survey of the coast of California and development of the approaches and channels of Newport Bay, near Point Lasuen; topography of Santa Cruz Island, and hydrography of its vicinity; triangulation across the Santa Barbara Channel, from Gaviota Pass; hydrography of San Louis Obispo Bay, and development of dangers to navigation near Point San Luis; special topographical survey of Point Sur, for the Light-house Board; tides and currents observed in San Francisco Bay; soundings between Yerba Buena and Oakland, and abreast of Sancelito; development of a shoal off the South Farallon; buoyage of Noonday Rock; in-shore soundings completed between Cape Mendocino and Rocky Point; reconnaissance for intervisible stations from the Pacific Coast, across the Sierra Nevada mountains, to the vicinity of Austin, Nevada; triangulation and topography north and south of Ten-mile River, Cal., completing the detail survey between Point Cabrillo and Shelter Cove; discovery and determination, in position, of a dangerous rock in the passage used by coasters between Blunt's Reef and Cape Mendocino; triangulation of the coast between Rocky Point and Klamath River, including the vicinity of Redding's Rock; in-shore soundings extended along the coast of California from False Klamath northward to Mack's Arch on the coast of Oregon; reconnaissance of the summit and region of Mount Shasta as a point for triangulation; topography of the shores of Columbia River, Oregon, extended from Oak Point to Smith's Island; tidal observations at Astoria; triangulation and topography of the coast from Point Adams south towards Nehalem River; detailed survey of the eastern shores of Duwamish Bay, W. T., including the town of Seattle and part of Lake Union; tidal observations at Port Townsend, W. T.; surveys of harbors on the coast of Alaska, with determinations of latitude, azimuth, the magnetic elements, and observations for correcting errors in geographical positions as now appear on charts, and for the height of Mount Crillon, Mount Fairweather, Mount St. Elias, and other prominent landmarks on the coast of Alaska.

Progress in office-work has been kept up to that of the field-work of the preceding season; computations of the current geodetic, trigonometrical, and tidal observations have been duly made, including the preparation of records and results for publication; tide tables for the principal ports of the United States for the year 1876 have been published; the drawing of fifty-four charts has been in progress, and of this number sixteen have been completed; twenty-nine sketches of harbors on the coast of Alaska have been drawn for publication by lithography; eleven new copperplate charts have been begun, thirty-eight have received additions by engraving, and eleven have been completed; an aggregate of fourteen thousand copies of charts has been issued in the course of the year; the first volume of the Coast Pilot for the Atlantic Coast, giving sailing directions for harbors between Eastport and Boston, has been published, and a second edition, illustrated by charts, is in preparation; the second volume, comprising the coast from Boston to New York, is well advanced towards publication.

The estimates for continuing the survey of the Atlantic and Gulf Coasts of the United States are intended to provide for the following progress:

Field-Work.—To continue the topography of the western shores and islands of Passamaquoddy Bay and its estuaries, of the coast and eastward of Penobscot Bay towards Narraguagus Bay; to finish work on the islands and shores of Penobscot Bay and River; to continue the determination of heights at some of the principal trigonometrical points between Boston and the St. Croix; and of coefficients of refraction; to complete the hydrography of Penobscot Bay and River, and continue soundings in the coast approaches eastward of Penobscot Bay; to continue a topographical and hydrographic survey of Portsmouth Harbor; to make such additional triangulation as may be requisite for that and other surveys on the eastern coast, and determine the position of new light-houses between Eastport, Maine, and New York; to continue soundings along the coast of Maine, and other off-shore hydrography between Cape Cod and Manan, and make special examination for the sailing lines for charts; to continue tidal observations, and to make such astronomical and

magnetic observations as may be required; to continue such topographical and hydrographic resurveys of the coast between Cape Cod and New York as may be found necessary; to continue the survey of the Connecticut River from its mouth to Hartford; to make such examinations as may be required in New York Harbor, and such surveys in its vicinity as may be found necessary; to make, at this port, observations on tides and currents; to extend the plane-table survey of the Hudson River above Haverstraw; to continue the triangulation between the Hudson River and Lake Champlain; to make the requisite astronomical observations; to continue the topographical and hydrographic survey of the coast of New Jersey, and the resurvey of the hydrography of Delaware Bay and River; to connect the Atlantic triangulation with that of Chesapeake Bay, near the boundary line between Maryland and Virginia; to complete the detailed resurvey of the James River, Virginia, including the hydrography, and continue the plane-table survey of the Potomac River; to continue southward the main triangulation along the Blue Ridge, parallel with the coast, including astronomical and magnetic observations; to continue the supplementary hydrography between Cape Henlopen, Delaware, and Cape Henry, Virginia, and in Chesapeake Bay, and also the tidal observations; to measure a base-line of verification and determine azimuth for the coast triangulation south of Cape Lookout; to make the astronomical and magnetic observations requisite; to continue the off-shore hydrography between Cape Henry and Cape Fear; to complete the hydrography of Pamlico Sound and its rivers, and that of Core and Bogue Sounds, and sound the entrance to Cape Fear River; to extend northward the primary triangulation along the eastern and southern slopes of the Alleghanies in North Carolina and Alabama; to continue the topographical and hydrographic survey of the rivers on the coast of South Carolina and Georgia; to determine azimuth for the triangulation of the coast of South Carolina and Georgia; to continue the detailed survey of the sea islands and water passages between Charleston and Savannah, and to make tidal observations; to make a hydrographic resurvey of Georgetown (S. C.) Harbor and approaches, and continue the off-shore hydrography between Cape Fear, N. C., and the St. John's River, Florida; to continue, southward from Cape Canaveral, the triangulation, topography, and hydrography of the eastern coast of Florida, including Indian River; to continue the triangulation, topography, and hydrography of St. John's River; to make the requisite astronomical observations; to continue the hydrography off the eastern coast of Florida from Mosquito Inlet to the southward; to continue soundings, and observations for sea temperatures, in such parts of the Gulf stream as may be deemed advisable, between the west end of Cuba and Nova Scotia, and dredging along the coast within the same limits, in conjunction with the United States Commission on Fish and Fisheries; to continue the astronomical and magnetic observations requisite between Cape Florida and Pensacola; to continue the triangulation, topography, and hydrography of the western coast of Florida, south of Tampa Bay, and to the southward of Charlotte Harbor; of the coast of the peninsula between Tampa Bay and Cedar Keys, and between Apalachee Bay and Pensacola; to run lines of soundings and make observations of sea temperatures in the Gulf of Mexico, and develop the hydrography of the Gulf coast included in the field operations; to connect the trigonometrical survey of the Mississippi River, at New Orleans, with that of Lake Borgne and Lake Pontchartrain, and continue the trigonometrical, topographical, and hydrographic survey of Lakes Pontchartrain and Maurepas, and of the Mississippi River above Carrollton, La.; to determine geographical positions, and make the astronomical and magnetic observations required; to extend the triangulation, topography, and hydrography of Louisiana westward of the Mississippi delta, and continue the hydrography of the Gulf of Mexico between the mouth of the Mississippi and Galveston, Texas; to continue the triangulation, topography, and hydrography of the coast of Texas westward between Sabine Pass and Galveston and between Corpus Christi and the Rio Grande; to measure a base-line of verification and make the astronomical and magnetic observations requisite between Sabine Pass and the Rio Grande; to continue the hydrography of the approaches to the coast of Texas; to continue the determination of the positions of new light-houses and life-saving stations along the coast between New York and the Rio Grande; to continue the field-work for the description and verification of the work for the Coast Pilot; and to continue the organized system of magnetic observations required for a complete magnetic survey.

Office Work.—To compute results from the field operations made along the Atlantic and Gulf Coasts, including astronomical, geodetic, geographical, magnetic, and tidal-work; to continue the reproduction of the original topographical maps, and to plot the hydrographic charts; to continue the drawing of the general chart of the coast from Quoddy Head to Cape Cod, and of charts Nos. 1 and 2, showing the coast of Maine, between St. Croix River and Petit Manan Light-house; to continue drawing and engraving of chart No. 3, which includes Frenchman's Bay, Mt. Desert Island, Blue Hill Bay, Isle au Haut Bay, and their approaches, also local charts of Mt. Desert Island, Eggemoggin Reach, Penobscot Bay, of east, and to draw and engrave the chart of Lake Champlain; to continue the drawing and engraving of charts of Thames River, and of Connecticut River, to the head of navigation; to complete the engraving of chart No. 7, from Seguin Island to Kennebunkport, and to draw and engrave the resurvey of the entrance to Nantucket Sound, including Monomoy Shoals; to draw and engrave the resurvey of the eastern entrance to Long Island Sound, and to continue a new chart of Long Island Sound; to complete the engraving of chart No. 21, showing the coast between Sandy Hook and Barnegat Inlet; to continue the drawing and engraving of No. 22 and No. 23, between Barnegat and Cape May; to make additions to the charts and sketches between New York and Cape Henry; to continue the drawing and engraving of a new chart of Delaware Bay and River, and to complete that of James River; to continue the drawing and engraving of the general chart of the coast between Cape Henry and Cape Lookout; and of charts No. 37, No. 39, No. 42, No. 43, No. 44, No. 45, No. 46, and No. 47, showing parts of the Atlantic Coast between Cape Henry and Lookout, including Pamlico Sound; to continue engraving the general chart of the coast between Cape Hatteras and Cape Romain, and to continue the drawing and engraving of that of the coast between Cape Romain and the St. Mary's River, and of charts No. 51 and No. 52, between Cape Fear and Winyah Bay; to continue the drawing and engraving of a new chart of Georgetown Harbor, S. C., and to make additions to the charts between Cape Henry and the St. Mary's River; to continue the drawing and engraving of the general chart of the coast from St. Mary's River to Cape Canaveral, and of charts No. 59 and No. 60, from St. Augustine to Cape Canaveral, and to make additions to the charts of the coast between St. Mary's River and Cape Florida; to continue the drawing and engraving of charts No. 80, No. 81, No. 82, No. 83, No. 84, No. 85, No. 86, and No. 87, showing the Gulf Coast between Chassahowitska River and Pensacola entrance, and of the charts of Tampa Bay; to engrave the chart of St. Joseph's Bay, and the chart of St. Andrew's Bay; to complete the drawing and engraving of charts No. 91, No. 92, No. 93, No. 94, and No. 95, showing Lake Borgne, part of Lake Pontchartrain, Isle au Breton Sound, and the Mississippi River, between New Orleans and the Gulf of Mexico, and the general chart showing the sea approaches to the Mississippi River; to continue the drawing and engraving of the general chart of the coast of Louisiana and Texas, from Atchafalaya Bay to Galveston; to continue the drawing and engraving of that between Galveston and the Rio Grande, and of charts No. 109 and No. 110, showing Aransas Bay, Copano Bay, and Corpus Christi Bay; for material for drawing, engraving, map printing, for electrotyping, photographing, for instruments and apparatus. Total for the Atlantic and Gulf Coast, involving work on the coast of the following States, viz: Maine, New Hampshire, Vermont, Massachusetts,

Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, and Texas, will require \$380,000.

The estimates for continuing the survey of the Pacific Coast of the United States are intended to provide for the following progress:

Field-Work.—To make the requisite observations for latitude, longitude, azimuth, and the magnetic elements at stations along the Pacific Coast of the United States; to continue off-shore soundings on the coast of California, Oregon, Washington Territory, and tidal observations at San Francisco, Astoria, Port Townsend, and such other localities as may be necessary; to continue the main-coast triangulation from Monterey Bay to the southward, or from Point Conception to the northward, from San Pedro toward San Diego, including the islands off that part of the coast; to continue reconnaissance for the main triangulation upon the mainland from Point Conception to San Diego, from Russian River to the northward, from Columbia River north to Puget Sound, or south up the Willamette Valley; to continue the reconnaissance for, and commence the primary triangulation through, the Sacramento and San Joachin Valleys; to continue the coast triangulation and topography from Newport, Los Angeles county, towards San Diego, and that of the islands off that coast; to continue the tertiary triangulation and topography of the coast north of Point Conception toward Point Sal, or the tertiary triangulation and topography from Point Buchon towards San Simeon; to continue the hydrography between San Diego and Point Conception, between Point Conception and Monterey Bay; develop the hydrographic changes in San Francisco Bay and its approaches; extend hydrography between Cape Mendocino and the Klamath River; between Cape Sebastian and Port Orford, north and south of, and in the approaches to, the Columbia River; to continue the hydrography of Puget Sound and adjacent waters; to observe currents along the coast, and take soundings and temperature observations in the California branch of the Kuro Siwo current, and execute such other hydrographic work as local demands may require; to continue tidal and current observations at the Golden Gate, and observations on the ocean currents along the coast of California; to continue the triangulation and topography of the coast between Bodega Bay and Point Arena; between Cape Sebastian and Port Orford; to continue the triangulation, topography, and hydrography of the Columbia River; to complete the detailed survey between Cape Sebastian and Crescent City, and off-shore hydrography at Crescent City Reef; to measure a base-line and continue the triangulation of the Strait of Fuca and the triangulation and topography of Puget Sound and adjacent waters; to continue the reconnaissance of the coasts and islands of Alaska, with observations for tides and currents; and to make the requisite astronomical and magnetic observations; to continue the field-work, for the description of the coast and verification of the Coast Pilot, of the coasts of California, Oregon, and Washington Territory; and to continue the organized system of magnetic observations required for a complete magnetic survey.

Office-Work.—To make the computation from the observations made in the field, including astronomical, geodetic, geographical, magnetic, and tidal observations; to continue the reproduction of the original topographical maps, and to plot the hydrographic charts; to draw and engrave the additions on the general chart of the Pacific Coast of the United States; to continue the drawing and engraving of the charts of the coast from San Diego to Point Conception, No. 1, No. 2, and No. 3; to complete the engraving of a new chart of San Francisco entrance and Harbor, from resurveys; to continue the drawing and engraving of charts of the coast from Point Arena to Cape Mendocino, No. 8, of that from Cape Mendocino to St. George's Reef, No. 9, and of that from St. George's Reef to the Umpquah River, No. 10, Shoalwater Bay, Puget, and Washington Sounds; to continue the drawing and engraving of the chart of Columbia River and of the local harbor charts of the coast, with those of the northwestern coast. Total for the Pacific Coast, involving work on the coasts of the States of California and Oregon, and Washington Territory in Alaska, will require \$245,000.

For extending the triangulation of the coast survey to form a connection between the systems of triangulation along the Atlantic and Gulf and Pacific Coasts of the United States, and assisting in the State surveys, involving work in New Hampshire, Vermont, Connecticut, New York, Pennsylvania, New Jersey, Virginia, West Virginia, North Carolina, Alabama, Missouri, Illinois, Wisconsin, Kentucky, Kansas, California, Nevada, and Utah Territory, will require \$90,000.

For repairs and maintenance of the complement of vessels used in the Coast Survey will require \$50,000.

For continuing the publication of the observations made in the progress of the Coast Survey will require \$8,000.

For general expenses of all the work, rent, fuel, for transportation of instruments, maps and charts, for miscellaneous office expenses, and for the purchase of new instruments, books, maps, and charts, will require \$34,600.

The annexed table shows, in parallel columns, the estimates for the fiscal year 1875-'76, and the estimates herein submitted for the fiscal year 1876-'77:

Objects.	Estimated for 1875-'76.	Estimated for 1876-'77.
For continuing the survey of the Atlantic and Gulf coasts of the United States, including compensation of civilians engaged in the work, and pay and rations of engineers for steamers used in the coast survey, per acts of March 3, 1843, and June 12, 1858	\$400,000 00	\$380,000 00
For continuing the survey of the western coast of the United States, including compensation of civilians engaged in the work, and pay and rations of engineers for the steamers used in the work, per act of September 30, 1850	260,000 00	245,000 00
For extending the triangulation to join the survey of the Atlantic and Pacific coasts of the United States, and assisting in the State surveys, including compensation of civilians engaged in the work, per act of March 3, 1871	70,000 00	90,000 00
For repairs and maintenance of the complement of vessels used in the coast survey, per act of August 18, 1856	50,000 00	50,000 00
For continuing the publication of observations made in the progress of the coast survey, including compensation of civilians engaged in the work, the publication to be made at the Government Printing Office, per act of March 3, 1869	8,000 00	8,000 00
For general expenses of all the work, viz: Rent, fuel, transportation of instruments, maps, and charts, for miscellaneous office expenses, and for the purchase of new instruments, books, maps, and charts	37,000 00	34,600 00
Total	825,000 00	807,600 00

Respectfully submitted.

APPENDIX I.

Explanation of the estimate for refunding to States expenses incurred in raising volunteers. (See page 153.)

TREASURY DEPARTMENT,
Third Auditor's Office, Washington, D. C., August 6, 1875.

SIR: I have the honor to acknowledge receipt of your letter of 2d instant, asking what amount will probably be required to meet claims settled in this office during the fiscal year ending June 30, 1877, payable from the appropriation "*Refunding to States expenses incurred in raising Volunteers*;" and, in reply, have to state that the probable amount required will be three hundred thousand dollars, (\$300,000.)*

Very respectfully,

A. M. GANGEWER,
Acting Auditor.

To the Honorable SECRETARY OF WAR.

APPENDIX J.

Explanations of the estimate for support of the Leavenworth Military Prison, Fort Leavenworth, Kansas. (See page 153.)

WAR DEPARTMENT,
Adjutant General's Office, Washington, September 3, 1875.

SIR: In submitting the accompanying estimate for the support of the Leavenworth Military Prison, for the fiscal year ending June 30, 1877, I have the honor to state, no appropriation has ever been made for this purpose, the amounts heretofore appropriated being confined by law exclusively to the erection or alteration of buildings for the prison. The expenses for maintaining military prisoners, which are regular and continuous, will not, it is believed, be increased in the aggregate by an appropriation of the amount asked for.

The establishment of the prison for the confinement of military prisoners will almost entirely relieve the State penitentiaries, where it is deemed illegal to confine men for mere military offences, and the expenses, for which a special appropriation has been made annually, for keeping that class of prisoners in State institutions will be very small, and the estimate therefor may now be very much reduced.

Heretofore, before the prisoners at the military posts were collected at the Leavenworth Military Prison, their clothing, subsistence, &c., were drawn from Army supplies, and the expenses there were quite at the maximum, because very little, if any, of the labor performed could be regarded as offsetting the cost of keeping.

At the prison, the corresponding expenses will be much less, as the profit derived from the prisoner's labor will be applied toward his maintenance, and will soon, no doubt, wholly provide for it.

The progress which might have been made toward making the prison selfsustaining, has been retarded for want of funds to set workshops in motion, and having no appropriate employment for the prisoners, who cannot be worked to advantage in connection with the erection and alteration of buildings for the prison, they have been set to work about the military post of Fort Leavenworth. The estimate for tools and material for the shops is less than would be required were it expected to rely entirely on appropriation from Congress for that purpose. The receipts from sale of manufactured articles will, if afforded this aid to start with, not only supply any deficiency in this respect, but will pay to some extent the general expenses of the prison.

Estimate is made for supplying each man on his discharge from the prison with one suit of clothes, and five (5) dollars in money, which is a usual allowance at State institutions. It is intended that men confined in this prison shall serve fully up to the requirements of their sentences, but the aim will be to teach and reform as well as punish them, and a system of discipline will be maintained, and a course of instruction in useful occupations adopted, which will tend to elevate them and make them respectable citizens, and the wisdom of supplying these men with a neat substantial suit of clothing, at an expense for material only, for the garments will be made in the prison tailor-shops, and this small sum of money which is absolutely necessary to enable them to get away from the military reservation in search of employment, instead of turning them out in their prison garb, and with no means, cannot be doubted.

A copy of the letter from the commanding officer of the prison, transmitting the estimate, is also respectfully submitted herewith.

Very respectfully, your obedient servant,

E. D. TOWNSEND,
Adjutant General.

To the Honorable SECRETARY OF WAR.

HEADQUARTERS U. S. MILITARY PRISON,
Fort Leavenworth, Kansas, August 28, 1875.

To the ADJUTANT GENERAL, Washington, D. C.,
Through Headquarters Department of the Missouri.

SIR: I have the honor to enclose herewith estimates for the support of the United States military prison at Fort Leavenworth, Kansas, for the year ending June 30, 1877.

Having no data upon which I can base an opinion or make any estimate of the probable earnings of the prisoners, I have taken no account of them, but have based my estimate for clothing on the average of what has been worn out, and at the prices furnished me by the acting quartermaster general. The estimate may seem large, but if the clothing is furnished, as it has mostly been since the prison started, from old moth-eaten and rotten articles left over from the war, and condemned as unfit for issue to the troops, it will require it all, but it should be furnished the prison at the prices that

* Reduced by the Secretary of War to \$250,000.

it will bring in market, which would reduce the estimate more than one-half, making it about nine thousand, (\$9,000,) against eighteen thousand four hundred and seventy-five dollars (\$18,475) as estimated for, as directed to do by a telegram, of which the following is a copy:

WAR DEPARTMENT,
Quartermaster General's Office, Washington, D. C., August 14, 1875.

Capt. A. P. BLUNT, A. Q. M. U. S. Army,
Fort Leavenworth, Kansas.

Jackets, all sizes; coats, sizes one, two, and three; sack coats, lined and unlined—size one can be supplied at prices fixed by General Orders No. 75, War Department, 1871.

By order of the Acting Quartermaster General:

Very respectfully, your obedient servant,

J. D. BINGHAM,
Deputy Quartermaster General United States Army.

To clothe the prisoners in Government clothing it will cost an average of forty-five dollars and seventy-two cents' \$45 72.) To purchase material and manufacture at the prison it will average about thirty-five dollars, (\$35,) making a saving of ten dollars and seventy-two cents (\$10 72) per man. The latter estimated upon what it cost to clothe each military prisoner at the Kansas State penitentiary the past year.

The subsistence is estimated at a soldier's ration per man, and I have no means of making any calculation how far this can be reduced until I find how much ground will be allowed me for use as a farm. I arrived here too late in the spring to get ground, or to do any early gardening, but General Pope allowed me the use of an uncultivated strip along the bank of the Missouri River, which we planted, and shall raise about one hundred and fifty bushels of potatoes, eight hundred bushels of turnips, one thousand cabbages, two hundred dozen ears of green corn, three wagon-loads of pumpkins, fifteen bushels of string beans, two barrels of cucumber pickles, fifteen bushels of shelled corn, and one hundred bushels of sweet potatoes. Upon my arrival here in May I found the company fund in debt over five hundred dollars for mess furniture, &c., which debt I have not been able fully to pay as yet; and not being authorized to use money from the appropriation for that purpose, I have not been able to purchase any live stock until within the last few days, when I got seven pigs. If I had money to purchase I could easily feed at least one hundred and fifty full-grown hogs on the slops and garbage from the prison and post, and raise corn enough the next year to fatten them—thereby making a great saving of the rations at hardly any expense. For clothing and money furnished discharged prisoners, the estimate has been purposely made small, as should there be more than two hundred men discharged we shall have earned enough in the shops to make up the deficiency. As to material for workshops, we have only estimated for enough to fairly start, as in a short time we hope to be able to purchase all we require from our earnings. Owing to the large amount of labor required to alter the buildings for the prison, and to work for the depot quartermaster as mechanics and laborers, we have been unable to make anything for sale in our workshops, and shall not be able to do much profitable work until we can procure the proper machinery and tools.

Very respectfully,

J. M. ROBERTSON,
Major Third U. S. Artillery, Bvt. Brig. Gen. U. S. A., Commanding.

APPENDIX K.

Explanation of the estimate for the National Home for Disabled Volunteer Soldiers. (See page 154.)

THE NATIONAL HOME FOR DISABLED VOLUNTEER SOLDIERS,
Washington, D. C., July 30, 1875.

SIR: In pursuance of the act of Congress approved March 3, 1875, requiring the Managers of the National Home for Disabled Volunteer Soldiers to furnish to the Secretary of War estimates in detail for the support of the Home for the fiscal year commencing on the first of July next, I have the honor to forward the enclosed certificate in due form, from the minutes of the Board of Managers at their meeting in July, which we believe is a compliance with the statute.

Our estimates in detail as we have them made to us would go to each pound of nails, and each broom, light of glass, and pound of coal used in the establishment. These would be so bulky that you would hardly include them in your report to Congress, and they can be furnished to the Committee on Appropriations by the Board of Managers if required. If in your judgment those details should be furnished, please inform me and they will be sent on before the meeting of Congress.

I have the honor to be, very respectfully, yours,

BENJ. F. BUTLER.

To the Honorable SECRETARY OF WAR.

At a regular quarterly meeting of the Board of Managers of the National Home for Disabled Volunteer Soldiers, held at the Eastern Branch of said Home, near Augusta, Maine, on the twelfth day of July, A. D. 1875, the following, among other proceedings, were had:

The President called the attention of the Board to the provisions of an act of Congress approved March 3, 1875, requiring the Managers to furnish to the Secretary of War estimates in detail for the support of the Home for the fiscal year commencing on the first of July next, and thereupon the Managers proceeded to said work, and after a careful exami-

nation of the quarterly estimates and expenditures of the several Homes, and consideration of the whole matter, made the following estimates for the support of the Home for the fiscal year commencing July 1, 1876, which the President of the Board was directed to transmit to the Secretary of War:

For current expenses, including repairs, of the Central Branch.....	\$476,877 71
For current expenses, including repairs, of the Eastern Branch.....	137,634 47
For current expenses, including repairs, of the Northwestern Branch.....	139,070 88
For current expenses, including repairs, of the Southern Branch.....	115,150 38
For out-door relief and incidental expenses	30,000 00
Total required for the support of the Home for the year.....	<u>\$898,733 44</u>

DAYTON, OHIO, July 26, 1875.

I, Lewis B. Gunckel, Secretary of the Board of Managers of the National Home for Disabled Volunteer Soldiers, do hereby certify that the above proceedings were had at the time and place aforesaid, and that the same are truly and correctly copied from the minutes of the Board in my possession. Witness my hand and the seal of the National Home, the day and year last above written.

[SEAL]

LEWIS B. GUNCKEL,
Secretary of the Board.

APPENDIX L.

Explanation of the estimate for International Exhibition of 1876, War Department. (See page 154.)

INTERNATIONAL EXHIBITION, 1876,
Office of the Board on behalf of U. S. Executive Departments,
Washington, D. C., August 22, 1875.

SIR: Referring to the original estimate of expense of representing the War Department at the International Exhibition of 1876, submitted to you January 6, 1875, and approved by you under date of January 7, 1875, and to the reduced appropriation for the purpose granted by the 5th section of the sundry civil appropriation act of March 3, 1875, I have the honor to submit the following:

The amount originally estimated for was \$200,000, to be expended in transportation of articles, hire of employes, necessary expenses of officers, and all contingencies connected with the exhibition on the part of the War Department, and was to be exclusive of the cost of the building, for which a special appropriation was asked.

In making the appropriations for the several executive departments, Congress greatly reduced the respective amounts estimated for each.

The amount appropriated for the War Department was only \$133,000. From this amount it was prescribed that a proportion of the cost of a building for the accommodation of the several departments should be paid in case it became necessary to erect such a structure.

The board, on behalf of the several departments, has decided upon the erection of a building and the pro rata contribution of the War-Department fund to such purpose is \$21,451 61, leaving for the expenses of the War-Department exhibit only \$111,548 39.

I deem it of much concern to the dignity of the Government that, being a voluntary contributor to this exhibition, its several departments should be fully and liberally represented; and, as the representative of the War Department at the exhibition, I beg to request that Congress may be requested on behalf of that honorable branch of the service, to appropriate a sum sufficient to make up the amount originally asked for, or say, \$89,000. It is respectfully suggested that this amount might be included in the annual estimate of the War Department, to be expended under the direction of the board on behalf of the executive departments in the same manner as the funds now available are expended. This sum will enable a full and creditable display to be made on behalf of the War Department as originally intended, and the prestige of the nation as a war power will be much enhanced thereby.

I have the honor to be, very respectfully, your obedient servant,

S. C. LYFORD,
Bvt. Lieut. Col. U. S. A., Representative of the War Department.

The Honorable SECRETARY OF WAR.

APPENDIX M.

Explanation of the estimate for geological survey of the Territories. (See page 158.)

OFFICE OF U. S. GEOLOGICAL AND GEOGRAPHICAL SURVEY OF THE TERRITORIES,
Washington, D. C., July 20, 1875.

SIR: In explanation of the estimates for the field expenses of the geological and geographical survey of the Territories of the United States for the fiscal year ending June 30, 1877, I would respectfully state that that sum has been appropriated by Congress for four successive years, and that it is really necessary to preserve the present organization. The survey would be far more efficient and the results far greater in proportion if the sum were raised to one hundred thousand dollars. The work of the survey will hereafter be carried on in remote portions of the west, requiring much land transportation, and the general expenses will be increased. Secondly. The estimate for engraving is of the utmost importance to the success of the survey. Over two hundred quarto-plates of objects in natural history, numerous maps, and sections

which are needed to place the results of our labors before the people, are awaiting appropriations from Congress. They are now in the hands of the engraver, and are partially completed. These reports, of which these engravings form a part, lie at the foundation of all our labors. I also submit the estimate of \$3,600 for office rent and expenses.

Hoping that the above estimate will receive the favorable attention of the Secretary and Congress, I have the honor to be your obedient servant,

F. V. HAYDEN,
U. S. Geologist.

To the Honorable SECRETARY OF THE INTERIOR.

FISCAL YEAR ENDED JUNE 30, 1875.

TREASURY DEPARTMENT,
WASHINGTON, D. C., *December 1, 1875.*

SIR: In compliance with instructions received from you, I have prepared for publication in the book of Estimates a Combined Statement of the Receipts and Disbursements of the Government, by appropriations, exclusive of the principal of the public debt, for the fiscal year ended June 30, 1875, exhibiting the various sources of the revenues; the *apparent expenses* of each branch of the service under the several Departments, and of each Department, on account of "salaries," "ordinary expenses," "public works," "miscellaneous," and "unusual and extraordinary;" and the *actual expenses* of the same, and the *actual revenues*, by deductions from them of those items which appear in both accounts by requirements of law, but which are not *actual revenues* or *true expenditures*, and other items on account of branches of the service intended to be self-supporting, the expenses and revenues of which must by law enter into the accounts of the Treasury.

I have the honor to be, very respectfully, your obedient servant,

J. T. POWER,
Chief of Warrant Division.

Hon. B. H. BRISTOW,
Secretary of the Treasury.

FISCAL YEAR ENDED JUNE 30, 1876

TREASURY DEPARTMENT

WASHINGTON, D. C., December 1, 1875

SIR: In compliance with instructions received from you I have prepared for publication in the book of publications a combined statement of the receipts and disbursements of the Government for the fiscal year ended June 30, 1876. This statement is divided into two parts, the first showing the receipts of the Government, and the second showing the disbursements. The receipts are divided into "ordinary receipts," "extraordinary receipts," and "receipts from the sale of public lands." The disbursements are divided into "ordinary disbursements," "extraordinary disbursements," and "disbursements for the purchase of public lands." The statement is prepared in accordance with the instructions of the Secretary of the Treasury, and is intended to show the actual receipts and disbursements of the Government for the fiscal year ended June 30, 1876. It is not intended to show the estimated receipts and disbursements for the fiscal year ending June 30, 1877.

I have the honor to be, very respectfully, your obedient servant,

J. T. POPE

Chief of Bureau

Hon. R. H. Bristow,
Secretary of the Treasury

EXAMINING CORPS.

The examining corps of the Patent Office consists of twenty-four Principal Examiners, each having a First, Second, and Third Assistant Examiner to aid him in the examination of applications for patents. Inventions of as nearly a homogeneous character as possible are grouped in classes and assigned to each Principal Examiner. The great increase in the number of applications for patents prevents as early action upon them as is desirable, and the delays occasion much annoyance, and frequently great loss to inventors. In order to relieve this burden upon the Office, it will be necessary from time to time to subdivide the present classification, and to assign the examination of some well defined groups of a less complicated character to the charge of a First Assistant Exam-

iner. To do this it will be proper, and I would recommend, an addition to the examining corps of the Office of six First Assistant and six Second Assistant Examiners, to be detailed by the Commissioner of Patents to such work as the best interests of the Office and the public require.

I also recommend that the clause in the act of March 3, 1875, United States Statutes at Large, vol. 18, page 365, abolishing the grade of Third Assistant Examiner be repealed, and have inserted a clause to that effect in a draft of a bill which I shall have the honor to present for your consideration.

I suggest that the abolition of the grade of Third Assistant is at the least premature, as the duplication of the back drawings, which was expected to so much facilitate the work, has not been completed, the appropriation and the time having both proved inadequate. I am of opinion that even when the back drawings are thus reproduced, although their importance can hardly be overestimated, it will not be advisable to reduce the examining corps as proposed, for with each year another 20,000 new applications for patents are presented, and the region of search is proportionately increased, while the constant production of books, disclosing new processes and machinery at home and abroad is another domain of accumulation, whose magnitude one must view with dismay unless the corps be maintained at an adequate strength.

The patent law has never defined the duties of Principal Examiners and their assistants, and as the duties assigned them are of a judicial character, involving great responsibility, and in most instances their action is, practically, final, and not subject to review by any higher authority, I beg leave to suggest an additional section to the patent law, which I have embodied in the draft of a bill referred to.

OFFICIAL GAZETTE OF THE PATENT OFFICE.

This publication is now in its fifth year, having been commenced in January, 1872. It was designed to take the place of the reports, which ceased with the year 1871; in fact, no illustrated reports had been published since June, 1869.

The GAZETTE is issued weekly, and consists of a *letter-press* and a *heliographic* portion stitched together.

The *letter-press* portion contains the text of the decisions of the United States courts in

patent and trade-mark causes, and the decisions of the Commissioner of Patents; also alphabetical lists (patentee and subject-matter) of the issues of the week, and lists of designs, trade-marks, and labels.

The *heliographic* portion consists of the claims, brief description, and a portion of the drawing in each patent and reissue granted during the week.

The GAZETTE forms two volumes yearly of about one thousand pages each, and is accompanied by a yearly volume of four hundred pages, which contains inventor and subject-matter indexes of the patents and trade-marks of the year.

The GAZETTE is sold to subscribers at six dollars per annum unbound. One copy is furnished free to each member of Congress, and eight copies to as many public libraries designated by him.

I desire to draw attention to two facts in regard to the substitution of the GAZETTE for the former reports:

First. The reports issued from 1843 to 1869 were congressional documents, of which the Senate and House bore the expense; none of it, except the preparation of copy for the yearly index, being chargeable upon the force of the Patent Office, or upon the yearly appropriations therefor; and, further, all sums received from sales (\$6,646.33 in 1875) are covered into the Treasury of the United States, and do not swell the appropriation. These facts should be noticed in considering the official estimates of the coming year.

Secondly. The greater scope, fuller information, and the introduction of the new feature of reporting the decisions of the United States courts and of the Commissioner of Patents, indexes to and digests of which reports are prepared for and bound up in each half-yearly volume.

For the purpose of securing early and complete reports of the decisions of the United States courts in patent and trade-mark causes, I have addressed letters to the clerks of these courts requesting them to furnish copies of these decisions and decrees. Prompt replies have been made by some, and from others no communications have been received.

I would respectfully suggest that the clerks of said courts be required, by law, to furnish certified copies of such decisions and decrees to be published by the Patent Office in the manner described, and that when so published

they may have the same force and effect as the reports of cases published by authority of said courts; and, further, that authority be given to the Commissioner of Patents to appoint or detail a suitable person to supervise such publication, and prepare proper digests of the same.

Such a publication can be furnished to inventors and the legal profession at a very moderate price, and the whole subject of patents and patent-law decisions presented in a compact form for reference, and with a promptness never attempted in any country before the issue of the OFFICIAL GAZETTE.

PUBLICATION OF PATENTS.

All circumstances have combined to prove the wisdom of the change made some years since in the mode of issuing patents, namely, by printing the specifications and reproducing in fac-simile, by a heliographic method, the original drawings. The printing of the specifications was commenced November 20, 1866, and the reproduction of the drawings, at first by photography and then by photolithography, July 6, 1869.

Since July 1, 1869, one hundred and fifty copies of each specification and drawing of patents have been printed and stored for sale. Complete sets or single copies are now furnished at about one-twentieth of the former price, and at a profit to the Office. Complete copies of uniform size of the specifications and drawings since July 1, 1871, have been bound in issues of weeks and kept as records. These volumes, under regulations prescribed by Congress, were supplied to the United States courts and to other libraries, but the bulk soon became so onerous that a more compact form was devised.

MONTHLY VOLUMES OF PATENTS.

By omitting the displayed heads, running the specifications into ordinary book-form, and by reproducing the drawings on a scale of one-half linear, the work of a month is compacted into a volume the size of the weekly volumes previously issued. This has proved very satisfactory, and now complete copies within the period of four and a half years last past have been in the most important libraries of the country, where they can be consulted without expense to the searcher.

As stated in reference to the OFFICIAL GAZETTE, all sums received for copies of patents,

drawings, and volumes of issues and indexes, are covered into the Treasury, (\$45,380.85 in 1875, exclusive of sums received for OFFICIAL GAZETTE.)

REPRODUCTION OF BACK ISSUES.

The facility for examining patents granted between July 1, 1871, and the present time has proved so convenient to inventors and litigants, and has done so much to spread a knowledge of the scope and value of the Patent Office duties and work, that it was some time since determined by Congress that the issues for the period 1836-1871 should be placed in like condition, including a period of two years (July, 1869, to July, 1871) when the work of production was in a transition state, and several modes and sizes were adopted, which were discontinued after running for a while.

The reproduction of the work back of July, 1871, so far as the drawings are concerned, has been in progress for several years under the specific yearly appropriations for that purpose.

Unusual progress under the impulse of a generous appropriation has been made in this matter during the latter half of the past year, during which period alone the increased appropriation has been available.

During the past year 19,743 original drawings have been photolithographed, 154 copies of each being made. The total number of sheets thus obtained is 3,040,422. There are 16,250 sheets already traced ready for lithographing, and there remain 30,370 to be traced and photolithographed. The number not yet commenced is but one-fourth part of the whole number of issues back of July 1, 1871. The amount estimated for in the coming fiscal year will, it is believed, complete this work of reproducing the drawings.

I earnestly hope that Congress will see fit to authorize and provide for the reprinting of the back specifications to the year 1836, at which period the unfortunate fire destroyed the previous records beyond the possibility of reproduction. Until that is done the records of the patents of this country are only in manuscript, and of those manuscripts but two copies are in existence, while of the English patents all of the specifications are in print from the earliest period, (A. D. 1609,) and, by the liberality of the English government, we procure better records of the English patents than of our own. The proceeds of the sale of

such printed specifications would be largely re-imbursed to the Government. At present all specifications back of November, 1866, are furnished in manuscript. Anything short of the proposed mode of establishing and publishing the records of the Office must be considered but a temporary expedient, and really unworthy of the dignity of the Government, the importance of the subject, and the security of the interests involved.

GENERAL INDEXES OF PATENTS.

A general alphabetical index of patents from 1790 to 1873, embracing about 171,000 patents and trade-marks, arranged in separate sets under two heads (*subject-matter* and *inventors*) has been some time in preparation. The completed subject-matter index occupies 1,950 pages quarto, is electrotyped, and bound volumes have been for sale at \$20 per copy for some time past. The index of inventors is in a forward condition, and will be a work of similar size and price.

The work has been done out of the current appropriations. The sums received on sales are covered into the Treasury, as stated above.

LIBRARY.

For many years the library has been supplied by occasional drafts upon the "contingent fund." The amount received from this source has been quite insufficient to furnish it with the books actually necessary, and, relatively to the largely-increased volume of technical literature, the library is constantly running behindhand.

The earliest legislation found on this subject is, I think, contained in the act of March 3, 1839, chap. 88, sec. 5, in which an appropriation of \$1,000 was made from the patent fund, to be expended under the direction of the Commissioner for the purchase of books for the library of the Patent Office, (5 Statutes at Large, 353.) This may be regarded, perhaps, as the organizing act for the library, although some books may have been procured earlier (under contingent expenses) in administration of the act of 1836, chap. 357, sec. 7, requiring in each application for letters patent "an examination of the alleged new invention or discovery" as to its originality and novelty.

The consolidated act of July 8, 1870, chap. 230, sec. 15, provides "that there shall be purchased, for the use of said Office, a library of such scientific works and periodicals, both

foreign and American, as may aid the officers in the discharge of their duties, not exceeding the amount *annually appropriated* by Congress for that purpose." (16 Stat. at Large, 200.) This assumes that annual estimates and appropriations will be made specifically for the library.

In view of the fact that the growth of the library, by the continual accession of new and needful works, is, by law, as much a standing necessity of the present organization of the Patent Office as the support of a corps of examiners required to investigate such works, it would seem inappropriate to class its interests with fluctuating contingencies not capable of special indication. A practical evil resulting from the failure of special recognition by Congress has been the lack of means to purchase many technical journals and representative works on the mechanic arts which should be found on the shelves of a library invested with such important functions.

The medical library of the Surgeon-General's Office, which, as a special-reference library, most nearly resembles that of the Patent Office, although a younger library and much less consulted, now numbers upward of 37,000 volumes, while the Patent Office library does not exceed 23,000 volumes. The annual appropriation for the former library is \$5,000 out of the revenue of the Government.

An appropriation of \$5,000 from the fund collected by the Patent Office from the inventors of our country would be a moderate provision for supplying the deficiencies of the library, and maintaining its character as an exposition of the most recent state of the constantly-growing arts and manufactures.

Works of the character indicated are required to be examined in nearly every application that may be filed for an American patent. Inventors and counsel in patent causes come to this library from every portion of the United States, and have a right to expect that it shall be the best technical library in the country, and fully abreast with the most advanced thought of the world within the limits of its special domain.

INCREASED ACCOMMODATION.

The increase in the business of this Bureau is so great that I am impelled to urge most earnestly, as have my predecessors, your aid in supplying more enlarged accommodations for the employés, and additional room for

drawings, models, books, and papers that are required to be preserved for the use of the Office. From five to twelve persons are now obliged to occupy each of the twenty-four rooms assigned to the Principal Examiners, in size averaging twenty feet square. The necessary desks, tables, chairs, and cases for holding files and models so reduce the above area as to materially hinder and delay the work of the Office and impair the health of the employés.

The increasing demand for additional room for the arrangement and display of patented models, averaging over thirteen thousand yearly for the past eight years, has made it necessary to remove rejected models, to the number of about 10,000, to an open space under the roof of the west wing of the Patent Office building. The floor of this attic and the model-shelves are composed of rough boards, and the place itself is very difficult of access. The trouble increases yearly, and if no provision can be made for relief in this regard, it will be necessary to do away entirely with models. This would be very unfortunate, because they are in many cases absolutely necessary to the complete understanding of the inventions presented.

I am certain that an inspection by the Patent Committees of the Senate and House will assure them that the statements above made are not exaggerated.

The same remarks apply to the accommodations for drawings, printed records, books of reference, and patented files.

THE CENTENNIAL.

The Patent Office is to be represented at the Centennial Celebration, and a space of 10,000 square feet has been assigned for the exhibition of models of American inventions, illustrating the more important and useful industries. Models to the number of about 5,000 are being selected for this purpose, being about three per cent. of the aggregate number in the possession of the Patent Office. These, while illustrating in part the progress of our country in "mechanical and manufacturing industries," and the development of American genius and skill, represent in one way only the results attained. Another mode of presentation of the facts and figures in the case is obtainable from the Census Report of 1870, and the general subject-matter indexes of Patent Office reports since the year 1790.

In referring to the Census, under the head of "manufactories in operation in 1870 exclusively for agricultural implements," it is found that the—

Number of establishments in operation was.....	2, 076
Number of steam-engines at work.....	676
Horse-power.....	15, 873
Number of water-wheels at work.....	426
Horse-power.....	10, 209
Number of hands employed.....	25, 249
Capital invested.....	\$34, 834, 600
Wages paid.....	\$12, 151, 504
Material used, value.....	\$21, 473, 925

The Census shows an increase of \$34,578,825 in the value of agricultural implements manufactured over the amount reported in 1860, and of \$45,224,174 over the amount reported in 1850, while the total value for the year 1870 of the "mechanical and manufacturing industries" aggregates the sum of \$4,232,335,442.

The following are the products of agricultural implements of the manufactories first above referred to, being the articles manufactured and number made :

Cane-mills.....	108
Clover-hullers.....	5, 206
Corn-planters.....	21, 709
Corn-shellers.....	12, 941
Cotton-planters.....	2, 000
Cultivators.....	88, 740
Fanning-mills.....	19, 772
Grain-cradles.....	103, 646
Grain-drills.....	32, 033
Hand-rakes.....	207, 310
Harrows.....	9, 150
Harvesters.....	3, 566
Hay and straw cutters.....	30, 879
Hay-forks.....	1, 293, 260
Hoes.....	135, 139
Horse-powers.....	4, 541
Horse-rakes.....	80, 919
Lawn-mowers.....	2, 536
Mowers.....	39, 486
Plows.....	864, 947
Reapers.....	60, 388
Reapers and mowers combined.....	59, 645
Rollers and scrapers.....	4, 803
Seed-sowers.....	6, 900
Scythes.....	881, 244
Sythe-snaths.....	17, 680
Separators.....	1, 131
Shovels.....	25, 756
Sickles.....	300
Stump-pullers.....	124
Thrashers.....	22, 934
Other products.....	5, 206, 789

For the articles above enumerated, there have been granted between the years 1790 and 1873, inclusive—that is to say, since the organization of this Office, (1790)—the following patents :

Cane-mills.....	66
Clover-hullers.....	100
Corn-planters.....	647
Corn-shellers.....	378
Cotton-planters.....	173
Cultivators.....	1, 617
Fanning-mills.....	127
Grain-cradles.....	18
Grain-drills.....	186
Hand-rakes.....	9
Harrows.....	329
Harvesters.....	2, 244

Hay-forks.....	382
Hoes.....	201
Horse-powers.....	415
Horse-rakes.....	373
Lawn-mowers.....	38
Mowers.....	173
Plows.....	2, 451
Reapers.....	69
Reapers and mowers combined.....	61
Rollers and scrapers.....	141
Seed-sowers.....	579
Scythes.....	50
Scythe-snaths.....	26
Separators.....	334
Shovels.....	58
Sickles.....	13
Stump-pullers.....	191
Thrashers.....	732

I have further selected from the list of patents 1790–1873 the number of patents granted in some other classes or subjects of invention. These indicate the scope and versatility of the inventive genius of our country, and all enter more or less into the "mechanical and manufacturing industries" that have been referred to. They are as follows :

Bee-hives.....	645
Bending-machines for wood and metal.....	144
Boots and shoes, manufacture of, and articles used therein.....	817
Brick-kilns and brick-machines.....	808
Bridges.....	425
Brooms and brushes, and their attachments.....	750
Buckles.....	388
Burglar-alarms.....	165
Burners, gas, lamp, and vapor.....	793
Car-brakes.....	485
Car-couplings.....	961
Car-wheels.....	314
Carriages and their appendages.....	1, 495
Churns and their appendages.....	1, 391
Clothes driers and wringers.....	984
Curtain-fixtures.....	364
Fire-arms.....	1, 203
Gas and gas apparatus.....	1, 399
Grain, cutting, binding, and drying.....	135
Grinding and grist mills.....	371
Lamps and appurtenances.....	1, 483
Looms and appurtenances.....	1, 210
Paper, manufacture of.....	269
Pavements.....	404
Photography.....	346
Planing-machines, wood and metal.....	384
Propellers, and apparatus for.....	570
Printing-presses, apparatus and material.....	756
Railway apparatus and connections.....	1, 552
Roofs and roofing.....	506
Rotary engines.....	170
Saw-mills and machines.....	1, 981
Sewing-machines and their attachments.....	2, 295
Steam-engines and apparatus.....	1, 013
Stoves.....	2, 400
Straw-cutters and machines.....	401
Sugar mills and machinery.....	343
Telegraph and instruments.....	566
Toys.....	300
Tobacco-presses and manufactures.....	197
Valves.....	1, 497

Total number of patents issued since 1790.....	171, 640
Total number of reissues.....	6, 830
Total number of designs.....	8, 883
Total number of trade-marks.....	3, 287
Total number of labels.....	464

Respectfully submitted.

R. H. DUELL,
Commissioner of Patents.
